AGM Bird weigher for cage bird.
Pullets, layer and broiler in cages.

Layer

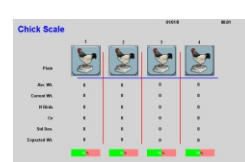

Pullets

The Columbus AGM live electronic bird weigher can handle up to 8 weighing plates and give the average weight for each of them.

The Columbus AGM cage bird weigher is a stand alone bird weigher for the modern poultry farm giving the critical information for successful growing, with out stressing the bird by manual weighing.

The Columbus AGM bird weigher is automatic and gives the following information:

- * Average weight of the birds
- * Number of weighing
- * Standart deviation
- * CV
- * Uniformity graph
- * Grow curve
- * Flock age

Color touch display

A twisted pair cable from plates to display

The bird weigher plate is made of
stainless steel 20x20x5 cm
