AGM Bird weigher

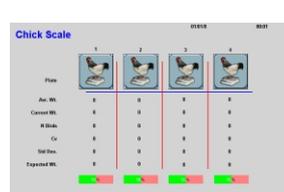

A TechnoCON Company
ENGINEERING LTD

The Columbus AGM live electronic bird weigher can handle up to 4 hanging weighing plates and give the average weight for each of them.

The Columbus AGM bird weigher is a stand alone bird weigher for the modern poultry farm giving the critical information for successful growing.

The Columbus AGM bird weigher is automatic and gives the following information:

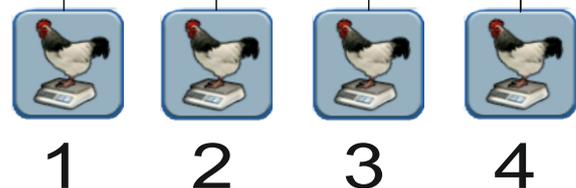

- * Average weight of the flock
- * Number of weighing
- * Standard deviation
- * CV
- * Uniformity graph
- * Grow curve
- * Flock age

Color touch display

A twisted pair cable from plates to display

The bird weigher plate is made of stainless steel
The rod made of aluminum easy to adjust
from 2 meters up to 2.5 meters.

Easily adjust the height from the floor during
the growing period to avoid litter to touching
the plate .
