AGM Silo Weigher

A Technocon Company
ENGINEERING LTD

The Columbus AGM Silo is an advance multi silo weigher for up to 4 silos . The Columbus AGM silo have a color touch display to show and program all its function .

Any number of silo legs can be connected to the AGM silo control display through It's A/D connection box.

The AGM Silo will give the following information :

- * Amount of feed in each silo.
- * Daily feed consumption.
- * Total Feed consumption
- * Restrictive feeding for breeder and pullet raising.
- * Alarm in case of low feed in the silo.

The AGM Silo can be used for restrictive feeding for breeder and pullets raising with very high precision.

The AGM Silo have a large memory for the collected data for the entire growing period.
